

CTS SELF-PRIMING CENTRIFUGAL PUMPS

2020 | 1

CTS Self-priming Pumps

The self-priming feature allows to use the pump in applications where standard CT pumps do not prove useful.

CTS is an open impeller self-priming centrifugal pump, manufactured from AISI 316L stainless steel.

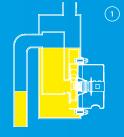

CTS H with excellent electro polished surfaces, FDA approved seals, high finish and mechanical strength, meet the demands from food and sanitary applications.

CTS I with AISI 316L chemical resistance and mechanical strength is a reliable choice for industrial applications.

The self-priming feature allows to use the pump in applications where standard CT pumps do not prove useful. The CTS pump is capable of creating up to 4,5 m of suction lift.

Working principle

- (1) In order for the priming action to be achieved, the pump casing has to be filled with liquid to a level above the impeller.
- (2) When the pump starts its operation, it is evacuating the air from the suction line thus creating negative pressure and lifting the product. The air is mixed with the liquid in the pump casing. The air escapes the casing through the discharge line while the liquid returns to the impeller as it has a higher specific gravity than the liquid/air mixture.
- (3) This process continues until the suction line is completely free of air and the pump can operate as a standard centrifugal pump.

Self-priming vs. standard centrifugal pump comparison

The CTS pump is a great alternative to our standard CT pumps when the self-priming ability is needed.

By replacing only one element - the casing with a self-priming chamber - we can achieve various advantages for our pump.

The pump can now suck the liquid form a lower level than it is positioned or handle liquids with high content of air.

The construction of the pump chamber ensures that there is always enough liquid left inside in order to prime the pump after stoppage.

CTS casing

Wide range of applications

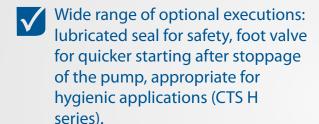

The CTS-I series has a very wide range of applications – from transfer of water, to pumping of mild chemicals. Together with the hygienic CTS - H series, the number of applications within food, beverage and pharmaceutical industries increases significantly.

Features & Benefits

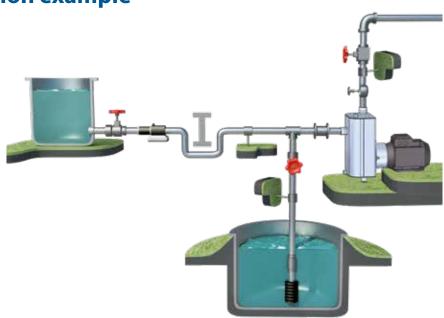

Easy installation and maintenance. Only the suction pipe has to be immersed and the pump can be located at a convenient spot. Disassembly of the pump can be done without interfering into the piping.

Replace only one part on your CT pump to achieve the self-priming ability.

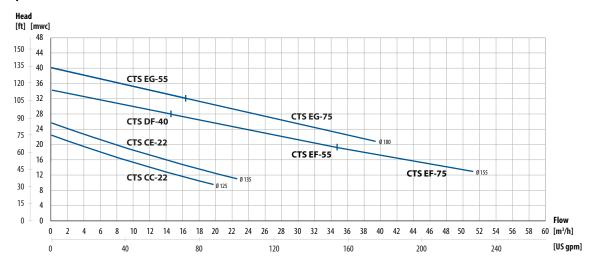

Installation example

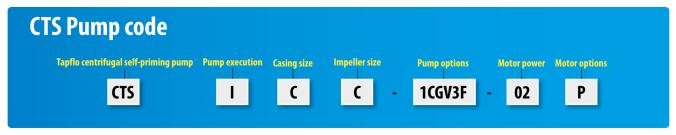

Performance curves

The performance curves are based on water. (T=20 $^{\circ}$ C, p=1000 kg/m, n=2900 rpm)

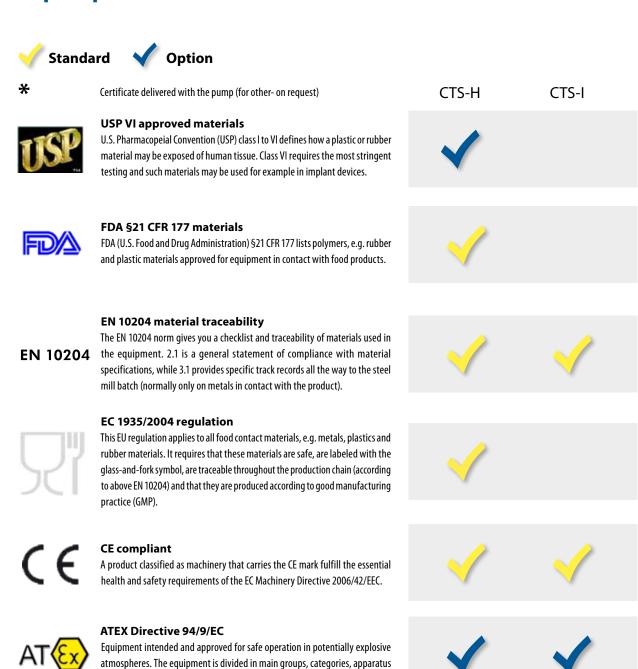

With 2900 rpm motor

Materials, data and limits

Model	CTS-H	CTS-I				
Casing	Stainless steel AISI 316L electro polished Ra < 0.8	Stainless steel AISI 316L glass blast				
Impeller	Stainless steel AISI 316L electro polished Ra < 0.8, open (standard) or optional semi open type	Stainless steel AISI 316L glass blast, open (standard) or optional semi open type				
Mechanical seal	Single ceramic/graphite (standard), SiC/SiC or SiC/ graphite optional with oil lube	Single ceramic/graphite (standard), SiC/SiC or SiC/ graphite, optional with oil lube				
O-rings	EPDM FDA requirements compliant (standard), FEP/silicone FDA requirements compliant or FKM FDA requirements compliant	EPDM (standard), FKM, FEP/silicone or NBR				
Motor	IP55, IEC frame B3/B14 (B3 on long coupled version). Available with ATEX cat 2 or 3, Eex e or Eex d motor					
Pressure rating	PN 2,5 bar (CTS C) at 20°C; PN 4 bar (CTS D,E) at 20°C					
Temperature	max 90°C					
Viscosity	max ~200 cSt					
Particles	max diameter is 6 mm (with standard open impeller), bigger if soft particles					

Options and special executions

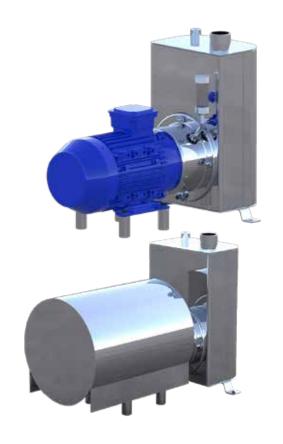

Buffer fluid system (CTS-I and CTS-H)

A great option when the product tends to solidify or crystalize.

A lube reservoir is connected to the air side of the mechanical seal.

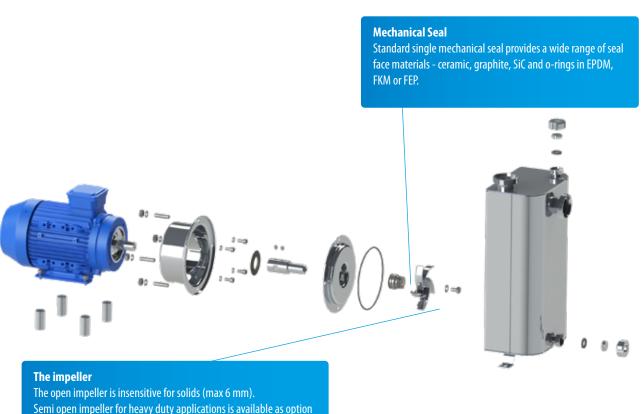

Hygienic shroud (CTS-H)

The hygienic motor shroud in polished AISI 316L, protects the motor from spraying water during pump cleaning procedure.

Ingenious design

A very simple and ingenious design, easy and quick maintenance, in many cases completely maintenance free. The effect is very short down time and extremely low maintenance costs.
